SUMMARY

I want a highly rewarding career where I can use my technical skills and knowledge for organizational and personal growth.

PROJECTS

Online Job Portal

The online job portal system is a platform between job seeker(student) and job provider(company). The Student or Job seeker can easily find and apply for job by login into system. The Employer or company can easily get expert employee from our job portal site by posting a job. The job portal website is a common place between job seeker and company.

Intelligent Advertisement System

An intelligent advertisement system utilizes data analysis and AI algorithms to target specific audiences, personalize content, and optimize campaigns for maximum effectiveness. It incorporates machine learning to predict consumer behavior, analyze trends, and adjust ad placements in real-time. This system enhances ROI by delivering relevant ads to the right people at the right time, across various channels such as social media, search engines, and websites.

Blood Bank System

A blood bank management system is a software solution designed to streamline the operations of blood banks and ensure efficient management of blood inventory. It typically includes features such as: Inventory Management, Donor Management, Staff Management
